Business implementation  
consultancy

“Our commitment,  
excellence.”

## WHO ARE WE ?

### Capacity and Experience

Del Pozo Ingeniería is a consultancy specialized in business implementation.

Our firm has more than 15 years of experience in the engineering and consultancy sectors. We have helped hundreds of companies and public administrations to begin their activities and facilities.

Our commitment to the client is extended, from the technical and urbanistic advice in the election of the place to develop an activity, until all the required permits and / or licenses are obtained.

We are experts in the integral management, including the necessary projects, and the processing and management of all the complementary documentation, obtaining with full guarantees the start-up of the activity in the optimal term.

Our customers guarantee us.

**OUR VALUES**  
**EXPERIENCE AND PROVEN DEDICATION**

## OUR CUSTOMERS

# Commercial Dossier

## ABOUT US

We are very proud of the human group that form our company: engineers, economists, draughtsmen and Topographers.

Throughout these years we have managed to form a multidisciplinary team of talents, specialized in the effective resolution of our client's problems.

In addition, we have a team of collaborators of the highest level in the world of architecture, interior design and design.

## WHAT DO WE OFFER?

- ✓ Best solutions
- ✓ Seriousness
- ✓ Professionalism
- ✓ Optimal term

## WE PUT OUR EXPERIENCE AT YOUR DISPOSAL

- ✓ You will get the best location for your activity
- ✓ Design the best distributions to make the most of the space
- ✓ We will find solutions for each problem

## OUR COMMITMENT: EXCELLENCE

### MISSION

To satisfy the technical advice needs of the companies in the start-up of their activity and installations, as well as to direct in this process the relations between these companies and the different public administrations. To advise our clients in the acquisition of real estate destined to the development of their activity, whether commercial, industrial, or service.

### VIEW

To be a reference company of technical advice in the business world at the highest level. To position and consolidate ourselves in new fields of advice and business consulting in both the public and private sectors, offering urbanistic management services.

### VALUES

Our customers are our greatest asset, so their full satisfaction is our priority objective. To achieve this, we work tirelessly to fulfill the commitments made.

TEATRO DEL SOHO

## OUR SERVICES

### **OPENING LICENSES - RESPONSIBLE DECLARATIONS**

The Activity or Opening License, and if applicable, the Responsible Declaration, is the document that accredits that a building or local has the proper and appropriate use to host the economic activity to which it is intended, being safe, accessible and without causing inconvenience to third parties. All economic activities must have this license.

### **WORK LICENSES**

The Works License is the Municipal authorization that authorizes the realization of any type of work in a building.

### **PROJECTS**

We carry out projects for all types of installations, activities or businesses. Our field of work covers the needs of our clients for the implementation of activities, the execution and legalization of works and installations.

### **LEGALIZATIONS**

Del Pozo Ingeniería performs a detailed analysis of the company's situation, draws up a plan of measures to be adopted for the adaptation of the installations. We accompany our client throughout the process of legalization of its installations, performing all the procedures for this that are necessary to request, the licenses that are mandatory for the normal development of the activity.

### **AUTO PROTECTION MANUALS**

Fire protection and life safety conditions for public spaces.

## **CONSULTANCY**

It is essential to have adequate technical consultancy in the process of choosing and acquiring a property that is going to be assigned to an activity, due to there are multiple requirements they will be required, and that will depend on a lot of variables such as activity, urbanistic qualification, situation, typology, structure, distribution, adjoining, etc. It is essential to comply with the legislation and regulations applicable at the national, regional and local levels, in order to guarantee the legalization of the installations and the start of the activity as soon as possible.

## **CERTIFICATIONS**

We carry out technical certificates for licenses and legalizations to obtain the First Occupation License or the activity license. We do certificates for changes of ownership, or environmental certificates for qualified activities, as well.

## **ENVIRONMENTAL STUDIES**

We have experience and a remarkable technical capacity to undertake a wide range of environmental projects in a rigorous and technologically advanced manner assuming as a priority commitment the continuous improvement in the quality of the works.

## **STUDIES AND ACOUSTIC MEASUREMENTS**

We perform studies and acoustic measurements both for activities subject to environmental qualification and to justify compliance with the CTE DB-HR.

## **TOPOGRAPHIC STUDIES**

We have the methodology and instruments necessary for topographic surveys for any urbanistic development.

## **ABSORBENT ACOUSTIC CEILINGS**

It is very common that the materials used in the coatings of the different walls that form a room do not have the ideal acoustic conditions to guarantee an adequate acoustic absorption in the environment.

This causes that, despite having an exquisite decoration, a magnificent menu or a wonderful service, the customer experience may be unpleasant due to the excess of noise perceived in their environment. This phenomenon is very common in public places such as restaurants, classrooms or conference rooms.

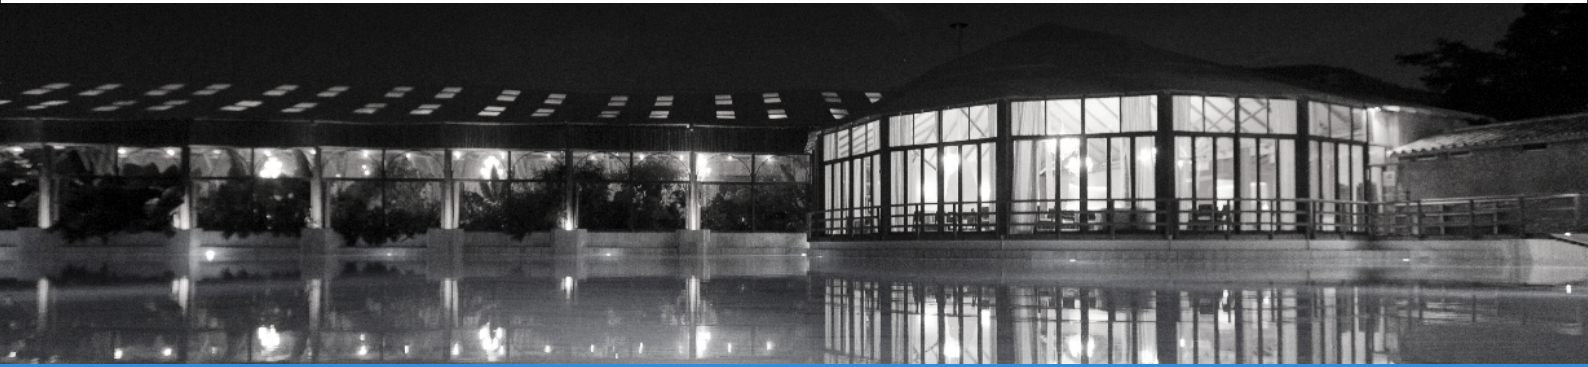

To solve this problem, we perform acoustic conditioning based on soundproofed panels of open pore attached or suspended, with different colors, textures and shapes that significantly improve the acoustic comfort of the enclosure, allowing the customer to enjoy the true service provided.
